**-Front-End Development:** HTML, CSS, BootStrap, Vue.js, JavaScript, jQuery, AJAX.

**-Database:** MySQL, MongoDB.

**-Programming Languages:** C++, Java, Python.

## Past Projects

---

### -CMS for car renting company

-Using PHP (Laravel), MySql Database and BootStrap form frontend, I have created a web page and admin dashboard for a car renting company with all the APIs needed for the Android app.

### -Employee Management System

PHP(Native) project using Tailwind for front-End and mySQL for database.

Manges records for all workers and their information, control permissions for certain system users using roles and authentication.

### -Chat Application, using Node js

A real time chat application between two users or more in the same room sending texts and images. using browser notification and saving messages in MongoDB.
